Subject: RE: TPC Group Management Update - December 5, 2019 1610 hours

Morning Craig,

There is no push to reduce any resources from any aspect of this response by any members of UC. As the .

EPA, TCEQ, and TPC will continue with current air monitoring operations through Monday and reassess. Presently, it is not expected that this effort will decrease over the next week of operations, as the site/facility has not been thoroughly contained, potential for pop-up fires exists, releases/discharges/emissions exist from potentially impacted containers/tanks/towers, and unforeseen potential issues.

Water sampling by UC will continue as appropriate. EPA will be requesting analytical services daily over the weekend to be consistent with TPC's.

Product recovery along the canals continues.

Shoreline clean-up of the canals continues.

Asbestos monitoring/debris response by TPC continues.

Waste disposal plan is approved and will begin being implemented.

It is not expected that any efforts will stop before 12/13/19.
Adam

Thanks Anish. Since it looks like things are now really starting to get under control, what's the strategy for closing out lines of reporting? Specifically, what's the plan to close out reporting on the following:

- air monitoring/sampling including ASPECT
- water sampling
- product/oil recovery
- shoreline clean-up
- asbestos
- waste disposal

I believe the key, from a reporting perspective, is to stop any "continuing to" bullets and move to definitive information e.g. "...will be completed by..."

Also, why did we drop our resource chart at the end of the this update?
